

Two million three hundred and thirty-five thousandx
dollars--enough to buy 46,700 deadly aerial bombs- was sent
to Germany through devious channels by a single "American"
corporation, ~~through~~ last year.

This is the unbelievable knowledge of high-ranking
U.S. Government officials.

And this, unfortunately, is ^{not an unusual} ~~axgeneral~~ situation ~~inx~~
~~Amerikanzkuztnesxyz~~ CLICK has found in its investigations of
the Nazi invasion of American business, an invasion made all
too easy by the desire of a small minority of American
businessmen for a few extra percent profit.

The
~~Thiz~~ corporation which sent this large sum to help
Hitler blitz his way to his ^{merciless} ~~bloody~~ control of the European
continent - the ultimate use to which the Nazis put all the
precious American currency they put their bloody hands on -
is one of which we, like millions of other Americans, had
never heard.

It is the Schering Corporation, a drug manufacturing
company, of Bloomfield, N.J., a comparatively new enterprise.
At the present time the U.S. Department of Justice is conducting
an investigation of this company before a grand jury, sitting
in New York City, to determine whether or not it has engaged
in restraints of trade and violations of our antitrust laws.

CLICK's independent investigation shows conclusively that
the Schering Corporation is persona grata to the murderous
masters of Germany, who have showered favors worth millions

upon the corporation.
